Amended on 18th Mar 2019

* Based on assumed usage. Number of boxes needed vary according to actual usage.

** Oxygen transmissibility at the center of -3.00D lens using boundary corrected, edge corrected DK value.

*** 3 weeks to indent if product is out-of-stock / for oblique axis

† In accordance with American National Standards Institute (ANSI) and International Organization of Standardization (ISO) published standards of UV-protection.

†† Help protect against transmission of harmful UV radiation to the cornea and into the eye. WARNING: UV-blocking contact lenses are not substitutes for protective UV-blocking eyewear. Long-term exposure to UV radiation is one of the risk factors associated with cataracts. Exposure is based on a number of factors such as environmental conditions (altitude, geography, cloud cover) and personal factors (extent and nature of outdoor activities). UV-blocking contact lenses help provide protection against harmful UV radiation. However, clinical studies have not been done to demonstrate that wearing UV-blocking contact lenses reduces the risk of developing cataracts or other eye disorders. Consult your eye care practitioner for more information. Disposable contact lenses are medical devices and patients are subjected to an eye examination with consultation fees. Johnson & Johnson Vision (Singapore) reserves the right to change any terms and conditions herein at any time without prior notice.
